Job Title: Data Engineer
Location: New York, NY (Remote until Covid-19)
Duration: 12+ Months
Bill Rate: $60/hr on contract W2
End Client: Banking Client

Responsibilities:
- Build analytics tools (Python based) that process customer data to provide timely results to our frontend applications.
- Identify, design, and implement internal process improvements: automating manual processes, optimizing data delivery, re-designing infrastructure for greater scalability, etc.
- Implement processes and systems to monitor data quality, ensuring production data is always accurate and available.
- Work closely with design, product, and operations to own our backend data systems through their entire lifecycle.

Required Skills:
- Strong Python and SQL skills.
- Experience with cloud-native infrastructure and tools (Linux, Docker, Kubernetes).
- A DevOps mindset for continuously delivering value in a collaborative team. Comfortable with Git/Github processes, code review, and CI/CD build automation.
- Automated unit, integration, data quality testing experience.
- Passion for software craftsmanship and clean code.
- A love of continuous learning, improvement, and delivery.

- Comfort in working and communicating with senior executives as well as business analysts.

Nice to have:
- Google Cloud Platform experience (BigQuery, Cloud Storage, PubSub, GKE).
- Experience with statically-typed languages, especially those relevant to data engineering (Scala/Kotlin/Java, Rust, Go).
- Cloud data pipeline tools experience (Apache Beam, Scio, Spark, etc).

Education:
Bachelor's degree in Computer and Information Science, or equivalent combination of education and/or experience required.

Job Title: Python Developer
Location: Chicago, IL (Remote until Covid-19)
Duration: 12+ Months
Bill Rate: $70/hr on contract W2
End Client: Banking Client
